

BoscoLighting's new 3W PIN LED downlights are the perfect solution for under-shelf task lighting. These compact and low-voltage downlights will add an extra layer of illumination and design to kitchens, galleries, display cabinets, jewelry shops, and any room where additional lighting is needed.

What's more, those low voltage downlights are also used to cast light in the gallery display cabinet and jewellery shops.

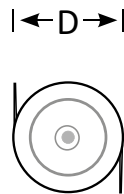

Since the cutout hole is too small to accommodate a plug, these downlights come supplied with an insulated cable only. They are also cool to touch so they aren't wasting energy heating up the room.

Available in both fixed and adjustable versions, these tiny downlights offer versatility in directing the light beam precisely where you need it.
