

BLEX-040

Housing with LED strips to throw light in two directions, this BLEX-040 aluminium extrusion is typically used for up-down lighting on walls and other vertical features. The product can also be fitted horizontally, to create reflected wash effects on roofs and flat surfaces.

Supplied as standard in 1m or 2m lengths. We also offer cut-to-length option, further saving time and effort.

Contact our lighting specialist for more information!
