

BLEX-TL003

BLEX-TL003 is a Plaster-in Trimless Extrusion designed to be plastered in joinery of walls to create a stylish light along an inside corner. The extrusion flange can easily be painted in the same colour as the walls and can therefore be perfectly integrated into almost every interior.

Suitable for any project that requires a seamless and minimalist lighting solution. Supplied as standard in 2m lengths. The high quality aluminium extrusion can be cut to length as your require. (MOQ may apply)

Contact our lighting specialist for more information!
