

The new Slimline Oyster Lights are designed to provide high illumination in indoor or outdoor applications. The integrated LED technology results in an ultraslim fitting – only 52mm thick. The light is delivered in a soft uniform manner and is able to be dimmed via Clipsal dimmers. Manufactured with a polycarbonate diffuser, it has an IP54 rating making it suitable for installation in damp locations.

The handy switch on the back allows you to change between 3000K, 4000K and 5700K CCT, depending on whether you want a warm or cool lighting environment.

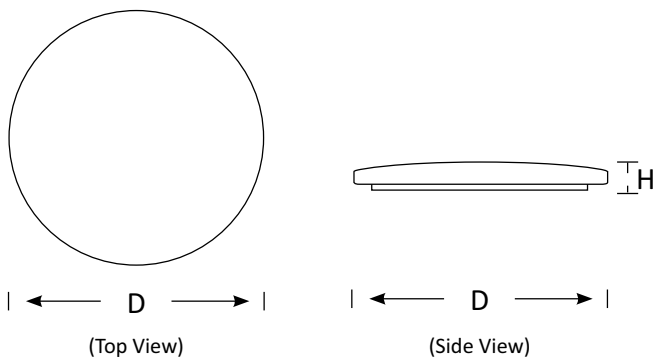

With upto 40,000 hours lifetime, maintenance is also minimal.

## Oyster Light VBOS
