

BoscoLighting's Suspended Ultra-thin Panel Lights with bi-directional (or direct/indirect) lighting output allow for ceilings to be illuminated as well as workspaces creating a more natural and soothing work or learning space.

By increasing the light indirectly, the differential between the focus area and the periphery is decreased which has been shown to decrease tension and stress. Perfect for commercial locations including offices, corridors and other locations as an alternative to tube lighting. Suitable for those 24/7 areas, our panel light is designed for better efficiency and longer life.

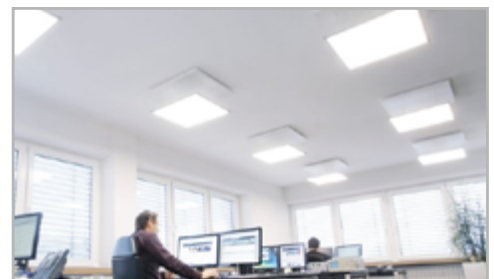

Light output: 70% downwards, 30% upwards

Features

- White anodised aluminium frame
- Frosted finish PMMA thermoplastic diffuser
- LED Driver Included
- Supplied with Flex & Plug
- Supplied with suspension kit

Panel Light 600MBS

Product Code	BLPL-600MBS-36	BLPL-600MBS-48
Power (W)	36	48
Luminous FLux(lm)	2510	3340
CCT	Warm White, Neutral White, Cool White (3000K-6000K)	
Connect	AU Standard Flex & Plug	
Dimming Options	Non-Dim/Trailing Edge/0-10V/DALI	
Dimensions(mm)	L595*W595*H10	
Weight(kg)	4.7
