

Surface mounted and constructed from aluminium alloy, the GKP09 eyelid bulkhead light benefits from the latest LED technology and is suitable for residential apartments and commercial premises.

Housed in an IP65 rated fitting, the wall light is able to be used both indoors and outdoors with protection against moist environment.

Fittings can also be supplied with sensors to brighten when motion is detected which is great for irregularly used stockrooms, warehouses or corridors.

Features

- IP65 rated, suitable for damp location installation
- Easy Installation
- Long lifespan and little maintenance required
- Suitable for both business, commercial & residential installation
- Fitting colour options: Black, grey, white
