Surface Mounted Light LEAH

BoscoLighting's LEAH surface mounted ceiling light is designed for modern applications. The light features minimalist design, perfect for illuminating your living rooms, bedrooms, receptions or hotel lobbies projects. This new version is substantially thinner than the original model.

You can easily change the mood and create ambience through the use of the controller. The highlighted benefit is that during the cold seasons you can have the light set to Warm White to create that warmer atmosphere. Then as the summer days arrive, you can alter the CCT value to Natural White or even Cool white to get cooler feelings.

Features

- Suitable for both commercial & residential installation
- Fitting colour: Black or White
- With controller: Tunable from Warm to Cool White, dimmable from 0% to 100%
- Rapidly switching the power ON/OFF can also change CCT without using the controller (Not recommended to work with sensor)
