

Illuminate your space with confidence using our state-of-the-art IP68 Waterproof SMD2835 Strip Light. Engineered to excel in challenging environments, this cutting-edge lighting solution combines durability, versatility, and unmatched performance to elevate any project. From outdoor landscapes to underwater displays and interior designs, trust in our strip light to deliver exceptional illumination that stands the test of time.

Features

- **Built Tough for Any Environment:** Our IP68 waterproof SMD2835 strip is hermetically sealed, guaranteeing durability even in continuous water immersion.
- **Professional Finish with Aluminum Extrusions:** Extend the lifespan and add a polished finish with optional high-quality aluminum extrusions¹, enhancing the visual appeal of your project.
- **Highly Flexible:** Super flexible form that'll stick to just about anything²
- **Optional Pre-Assembled Service:** Opt for our optional pre-assembled service (available when ordering LED extrusions and LED drivers) to streamline your installation, guaranteeing a seamless and professional finish with ease.
- **Tailored Lengths for Your Needs:** Our strip lights are offered in standard 5-meter rolls. For customised lengths, please allow for a longer lead time.
- **Waterproof End Sealing for Protection:** Ensure long-lasting performance by sealing the ends after cutting, maintaining waterproof integrity.

¹ Extrusions with an internal diameter of less than 15mm are not compatible due to the dimensions of the waterproofing end cap on the LED strip, which measures W14 x H6mm.

Product Code	BLSP-2835-120-IP68
Power (W)	20W/m
Luminous FLux(lm)	1700lm/m
IP Rating	IP68
CCT	Warm White 3000K, Neutral White 4000K, Cool White 6000K
Connect	Insulated Cable
Dimming Options	Various dimming options available on request
Dimensions(mm)	12*1000
Weight(kg)	0.1

IP68 Strip Light SMD2835

² Wipe dry the extrusion using a lint-free cloth before installation, peel back the tape backing and stuck in place using a static glove. Correct installation of this product requires a few dabs of silicon along the length to hold it in place. The glue is normally enough, but sometimes it doesn't stick so well to the paint and so we recommend a little dab of silicon every 20cm or so on each side of strip in a zig-zag pattern.
