

SMD3528 strip light is one of the most dynamic and versatile linear light sources, with optional 4.8W/M and 9.6W/M in power and different colours, it can be used as architectural decorative lighting, amusement park and theatre lighting, stairway accent lighting and general linear lighting.

It is easy to cut to size or extend as needed. We also provide solutions for various high quality aluminium extrusions to accommodate linear strip lighting. They are ideal if strip light will be openly visible once fitted, as they can create a more 'finished product'.

Contact us for details.

Features

- Easy to cut to size or extend as needed
- Super flexible form that'll stick to just about anything*
- Over 70 type of aluminium extrusions including flush and surface mounted as well as suspension options for housing the strips

*Wipe dry the extrusion using a lint-free cloth before installation, peel back the tape backing and stuck in place using a static glove. Correct installation of this product requires a few dabs of silicon along the length to hold it in place. The glue is normally enough, but sometimes it doesn't stick so well to the paint and so we recommend a little dab of silicon every 20cm or so on each side of strip in a zig-zag pattern.

Product Code	BLSP-3528-60	BLSP-3528-120
Power (W)	4.8W/m	9.6W/m
Luminous FLux(lm)	408lm/m	816lm/m
CCT	Single Colours, Whites	
Connect	Insulated Cable
