

Similar to the IP65 version, the new IP68 Waterproof SMD5050 Strip Light is available in 5 metre reel as default. Both strips consume the same exact amount of power as the other.

Hermetically sealed, the IP68 strip light is suitable for continuous immersion in water.

It can provide dynamic colour effects with red, green and blue LEDs. It can easily be adjusted into various colours and colour combinations. At maximum 14.4 watts per metre, this RGB strip light can be controlled by using compatible RGB 12/24 volt DC power supply with RGB DMX decoder.

We also provide solutions for various high quality aluminium extrusions to accommodate strips. They are ideal if strip light will be openly visible once fitted, as they can create a neat finish.

Features

- Super flexible form that'll stick to just about anything*
- IP68, can be immersed underwater for a certain amount of time.
- Required to seal the end with sealant after cutting, ensuring complete IP68 waterproof

*Wipe dry the extrusion using a lint-free cloth before installation, peel back the tape backing and stuck in place using a static glove. Correct installation of this product requires a few dabs of silicon along the length to hold it in place. The glue is normally enough, but sometimes it doesn't stick so well to the paint and so we recommend a little dab of silicon every 20cm or so on each side of strip in a zig-zag pattern.

Product Code	BLSP-5050-60-IP68-RGB
Power (W)	14.4W/m
Luminous FLux(lm)	1224lm/m
CCT	Single Colours, Whites
Connect	Insulated Cable
Dimming Options	Various dimming options available on request
Dimensions(mm)	12*1000
Weight(kg)	0.1

Please note: Not applicable in extrusion with less than 15mm internal diameter due to waterproofing end cap of the LED strip.

LED Strip Light IP68 Waterproof/RGB SMD5050
