

Similar to the IP65 version, the new IP68 Waterproof SMD5050 Strip Light is available in 5 metre reel as default.

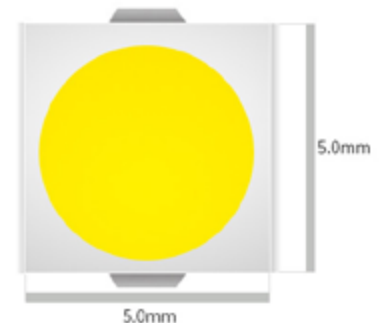

Hermetically sealed, the IP68 strip light is suitable for continuous immersion in water. With 14.4W/M in power and different colours, it can be used in places as variable as boutique, restaurant, office, lobby, bathrooms, kitchens, paths.

We also provide solutions for various high quality aluminium extrusions to accommodate linear strip lighting. They are ideal if strip light will be openly visible once fitted, as they can create a neat finish.

Features

- Super flexible form that'll stick to just about anything*
- IP68, can be immersed underwater for a certain amount of time.
- Over 70 type of aluminium extrusions including flush and surface mounted as well as suspension options for housing the strips
- Required to seal the end with sealant after cutting, ensuring complete IP68 waterproof

*Wipe dry the extrusion using a lint-free cloth before installation, peel back the tape backing and stuck in place using a static glove. Correct installation of this product requires a few dabs of silicon along the length to hold it in place. The glue is normally enough, but sometimes it doesn't stick so well to the paint and so we recommend a little dab of silicon every 20cm or so on each side of strip in a zig-zag pattern.

LED Strip Light IP68 Waterproof SMD5050

Product Code	BLSP-5050-60-IP68
Power (W)	14.4W/m
Luminous FLux(lm)	1224lm/m
CCT	Single Colours, Whites
Connect	Insulated Cable
Dimming Options	Various dimming options available on request
Dimensions(mm)	12*1000
Weight(kg)	0.1

Please note: Not applicable in extrusion with less than 15mm internal diameter due to waterproofing end cap of the LED strip.
