LED Strip Light
SMD5050

Features

- Easy to cut to size or extend as needed
- Super flexible form that'll stick to just about anything*
- Over 70 type of aluminium extrusions including flush and surface mounted as well as suspension options for housing the strips

*Wipe dry the extrusion using a lint-free cloth before installation, peel back the tape backing and stuck in place using a static glove. Correct installation of this product requires a few dabs of silicon along the length to hold it in place. The glue is normally enough, but sometimes it doesn't stick so well to the paint and so we recommend a little dab of silicon every 20cm or so on each side of strip in a zig-zag pattern.
